INTRODUCTION

BTCASH is a **BEP-20 token** whose function is to power the **BTMETAVERSE** ecosystem by acting as a utility token for all transactions conducted within the metaverse.

The block chains have created incredible opportunities for the new generation. With the advent of **Metaverse** and the gaming industry shifting more into it, the **BTCASH** made a rise in the Crypto market with increasing numbers of unmatched and super utility services till date. **BTCASH** is gaining recognition at it's presales launch. Our goal is to bridge offline to online, and web2 to web3 to prepare the world for a new fully tokenized reality.

Helping investors get the highest returns, with the lowest risk, requiring the minimum effort, in an easy to use suite with intuitive reporting, defines the heart of our mission. **Harnessing** the unique capabilities inherent to cryptocurrency, we are able to bundle numerous additional financial and security benefits with the **BTCASH** Token, all while making it low friction and easily accessible to the masses.

BTCASH allows BT Netizens to create, trade and make money off their non-fungible tokens and digital content and utilize the digital assets at all the platforms supporting **BTCASH** Token including **BTSMART** [the staking platform], **BTCASH CASINO** [the casino gaming platform], **BTCASH EXCHANGE** [the decentralized exchange], **BTCASH NFT** [the NFT portal] and **METAVERSE**.

WHAT IS METAVERSE

In its **Digital Iteration**, a metaverse is a virtual world based on blockchain technology. This all-encompassing space allows users to work and play in a virtual reflection of real-life and fantasy scenarios, an online reality, ranging from sci-fi and dragons to more practical and familiar settings like shopping centers, offices and even homes.

According to a recent **McKinsey & Co.** study estimate, the metaverse might be worth **$5 trillion** by 2030 as the globe rapidly moves toward adopting digital solutions for many dayto- day tasks. Gaming metaverse companies alone are anticipated to be worth approximately **$125 billion**, including blockchain-based initiatives such as **BTMETAVERSE**.

Metaverse takes you beyond the limitations of the real world and into a virtual one that's always there for you. It's a way for you to **connect** with others around the world, even if they're not physically in the same place as you.

In the case of BTMETAVERSE, players will be able to earn money by participating in various activities organized by the development team once the games are released, and they will be able to collect and sell items via the ecosystem's NFT marketplace and be rewarded in **BTCASH** Token.

team btcash

How does BTCASH fits in the metaverse?

Each **BTCASH NFT** will have a fully rigged up, animated 3D model associated with it. This will allow the **BTCASH NFTs** to be integrated into existing metaverse environments, meaning that the BT AR app won't be the only place you'll be able to play with your **BTCASH NFTs**. From the moment the **BTMETAVERSE** ECOSYSTEM launches we are committed to exploring partnership opportunities to allow you to walk your **BTCASH NFTs** in the metaverse, as well as building out the **Augmented Reality BT app** to allow you to walk your **NFT Characters** in real life. We want to allow you to take your NFT Characters absolutely anywhere, and we're determined to explore all possible avenues to make that a reality.

The **BTCASH** is designed to replace traditional currencies like dollars or euros. This token allows users to play games with their friends across the world, while also being able to trade virtual items with other players.

BTMETAVERSE is not a concept, it's been fully developed and is ready to launch post ICO ensuring immediate benefits to the **BTCASH** purchasers. The software is fully tested and the MVP (minimum viable product) is ready to try. Millions have already been invested to get the software to this state.

Will BTCASH launch it's own Metaverse?

Too right it will - the **BTMETAVERSE** is coming!

BTMETAVERSE is all about the community, so what it really comes down to is what the community wants, and **BTCASH** holders will be able to shape the **BTMETAVERSE** we ultimately build. If the community wants to be able to go to a virtual **BT PARK** OR Drive the **BT Super Car** whilst socialising with other **BTCASH** holders, then let us know! **BTCASH** is the token of the people, and we're keen to let the token holders shape the direction we take.

The **BTMETAVERSE**, a living and breathing space that blends physical and digital, is quickly evolving from a science fiction dream into a reality with endless possibilities.

team btcash

A world where people can interact virtually, create and exchange digital assets for real-world value, own digital land, engage with digitized real-world products and services and much more

BTMETAVERSE offers a completely immersive experience for its users that leverages blockchain and gamified DeFi mechanics to ensure a functional and digital internal economy. In this case, BTCASH is the logical solution for value exchange in the BTmetaverse; they can be easily spent for in-world products and services and earned through different means, from the buying and selling of assets to content creation and even rent.

TOKENOMICS

TOKEN DETAILS

Token Name: **BTCASH**
Ticker Name: **BTMETA**

Total Supply: **5 Billion**
Chain: **Binance Smart Chain (BSC)**

Network: **BEP20**

Contract Adress: **0x962d3e1397767310451EE72068B2E5bCef738bd8**

The statistics below shows the token distribution based on total supply of 5 Billion BTCash.
30%	**20%**	**10%**	**5%**
ICO SALE	GROWTH FUND	TEAM & MARKETING	COMMUNITY GRANTS
| **10%**	**5%**	**10%**	**10%**
OPERATION GRANTS	ECO FUND	FOUNDATION ENDOWMENT	EARLY ECOSYSTEM

Since the crypto market is becoming more saturated and competitive in recent years with new offerings, **BTCASH** Token is aimed at quickly gaining popularity. Like other decentralized cryptocurrencies, **BTCASH** is not issued by any central authority.

BENEFITS

No Hardware Required

Unlike PoW, PoS requires no equipment or hardware, nor the associated hardware and maintenance costs.
Great Passive Income

Unlike PoW, PoS requires no equipment or hardware, nor the associated hardware and maintenance costs.

Eco - Friendly

BTCASH is helping the environment by cutting down on high-energy efficient platforms such as Ether. Holding the token is more economical and ecofriendly than mining and staking other cryptocurrencies.

Scalable

Calability refers to a computational process in the blockchain world that involves handling a huge amount of throughout. PoS protocols, as shown by BTCASH's lower fees and high transaction outputs.

team btcash

WHAT IS STAKING

The staking of cryptocurrencies involves investing your crypto assets to operate a blockchain network and confirm transactions. Because some cryptocurrencies provide high-interest rates for staking, staking can be an excellent way to use your cryptocurrency holdings to create passive income.

Staking is a concept that will come up frequently if you are an investor in cryptocurrencies. Participants can earn rewards based on their holdings. On our platform, you can stake any crypto you want.

Staking is functional with cryptocurrencies that run their payment processing based on a model known as proof-of-stake. An approach that uses significantly less power than the standard proof-of-work protocol is this one. To fulfill the requirements of proof of work, miners need to use mining devices that have the computer able to solve mathematical equations.

Advantage of Staking

The fundamental advantage of staking is that it allows you to increase the amount of cryptocurrency that you own, and the interest rates can often be quite substantial. There are some situations in which you have the potential to make more than ten or twenty percent every year. If you choose to put your money into this kind of investment, you could make a lot of money. In addition, you only require a cryptocurrency that operates on the proof-ofstake mechanism.

BTCASH ECOSYSTEM PROJECTS

BTCASH (BTMETA) is built around six key projects that will drive its adoption and utility:

NFT Bidding

The BTCASH ecosystem will feature a decentralized NFT (Non-Fungible Token) bidding platform, allowing users to buy, sell, and trade unique digital assets seamlessly.

Features

- Decentralized Marketplace: A secure platform for listing and purchasing NFTs.
- Smart Contract-Based Auctions: Transparent and tamper-proof bidding system.
- Cross-Chain Compatibility: Support for NFTs from different blockchain networks.
- Royalties & Rewards: Artists and creators will earn lifetime royalties on secondary sales.

team btcash

BTCASH ECOSYSTEM PROJECTS

Casino Game

BTCASH aims to integrate blockchain technology into online gaming, offering a decentralized and fair casino experience powered by BTMETA.

Features

- Provably Fair Gaming: Uses blockchain to ensure game outcomes are transparent and fair.
- Instant Payouts: Smart contract-based payments for instant withdrawal of winnings.
- No Third-Party Involvement: Fully decentralized platform with no intermediaries.
- Multiple Game Options: Slots, poker, roulette, and more.

BTCASH ECOSYSTEM PROJECTS

Metaverse

BTCASH envisions a Metaverse powered by BTMETA, where users can engage in a digital world, buy virtual assets, and interact in immersive environments.

Features

- Virtual Land Ownership: Users can buy, sell, and develop virtual properties using BTMETA.
- NFT-Based Avatars & Assets: Players can customize characters and objects as NFTs.
- Decentralized Governance: Users participate in decision-making through a DAO (Decentralized Autonomous Organization).
- Cross-Platform Accessibility: The Metaverse will be accessible via VR, AR, and standard devices.

team btcash

BTCASH ECOSYSTEM PROJECTS
Decentralized Wallet

BTCASH will develop a secure, non-custodial decentralized wallet for storing and managing cryptocurrencies, NFTs, and digital assets.

Features

- Multi-Currency Support: Holds various cryptocurrencies beyond BTMETA.
- Private Key Ownership: Users maintain full control over their funds.
- Seamless Integration: Compatible with dApps, NFT platforms, and decentralized exchanges.
- Security & Encryption: Advanced security protocols to prevent hacks and fraud.

BTCASH ECOSYSTEM PROJECTS

Decentralized Exchange (DEX)

BTCASH will launch a decentralized exchange (DEX) to enable seamless and secure token swaps, liquidity provision, and staking.

Features

- Permissionless Trading: No KYC requirements; anyone can trade freely.
- Liquidity Pools: Users can provide liquidity and earn rewards.
- Yield Farming & Staking: Passive income opportunities for BTMETA holders.
- Cross-Chain Swaps: Compatibility with multiple blockchain networks.

BTCASH ECOSYSTEM PROJECTS

Blockchain

BTCASH plans to develop its own blockchain infrastructure, providing faster transactions, reduced fees, and improved security.

Features

- Scalability: High-speed transactions with minimal gas fees.
- Smart Contract Support: Developers can create dApps and deploy smart contracts.
- Interoperability: Connects with multiple blockchain networks for seamless asset transfers.
- Eco-Friendly Consensus: Adopting an energy-efficient consensus mechanism.

CONCLUSION

BTCASH is a gaming token built for effortless transactions and rewards within blockchain-based gaming ecosystems.

Our goal is to revolutionize the industry by integrating advanced technology to address real-world challenges. We strive to seamlessly connect the virtual and real economies through secure smart contracts and tamper-proof ledgers.

With its strong security, stability, and tamper-resistant algorithm, BTCASH stands out as a reliable cryptocurrency, making it an ideal investment in the ever-evolving digital asset space.
